### EDUCATION

#### HiLCoE School of Computer Science and Technology

- Bachelors Degree in Computer Science.
- Sep/2018- Dec/2023

### SKILLS

- Team Player Problem-solving
- Adopt new technologies quickly
- Effective Communication
- Understand the importance of deadlines
- Ability to work under pressure

### LANGUAGES

- English (Fluent)
- Amharic (Fluent)

### PROFILE

Creative Front-End Developer skilled in building modern, responsive, and user-friendly web applications. Proficient in HTML5, CSS3, JavaScript (ES6+), and frameworks like React.js and Next.js. Experienced in developing pixel-perfect UIs, integrating REST/GraphQL APIs, and optimizing performance for smooth user experiences. Strong understanding of responsive design, accessibility, and cross-browser compatibility. Adept at using tools like Git, Webpack, and Tailwind CSS, Framer Motion for animation, with hands-on experience deploying projects on Vercel and Netlify. I also have a solid understanding of how the backend works, which is reflected in my full-stack projects mentioned in my work experience. Passionate about crafting scalable, maintainable code and continuously learning emerging technologies to deliver innovative digital solutions.

### WORK EXPERIENCE

#### Hotel Reservation System Full stack Project

2023 - 2024

Language used: React JS • PHP • MySQL

- Designed a robust booking system that enables users to check the availability of listings hotels and rooms, select dates, and make reservations. Integrated a search functionality that allows users to filter and find suitable accommodations based on their preferences such as location, price range & amenities.
- Blogger Website  
Built a blogging website using Blogger (Google) with a custom domain and SSL certification.

#### Certificates

2024 - 2025

#### MERN Stack & Programming fundamentals certificate

- Practiced full-stack development with MongoDB, Express.js, React, and Node.js.
- Built coding projects and implemented CRUD operations with payment functionality
- Programming fundamentals  
Built projects: Tic-Tac-Toe game with basic HTML5, CSS, JavaScript and Task Tracker (CRUD with mock DB) using React.js

#### Projects & Learning New Technologies

#### Hands-on development and exploration of modern web technologies

- Built React apps including Netflix Clone (IMDb API) and Spotify Clone (Spotify API) using Context API for state management.
- Explored Framer Motion for animations and currently learning Next.js for server-side rendering (SSR).

#### Health Service Website

2025 - present

#### For DR.Saba Medium Clinic

- Developed a responsive clinic web showcasing services, specialised doctors, and contact details (location, email, emergency phone).
- Built with React (JSX), Tailwind CSS, and Framer Motion for smooth transitions and animations.
